

REPORT CYCLE ENHANCEMENTS

In order to validate a performance improvement for the MAIN FACS report cycle, MAIN will generate an unscheduled year-end set of reports in the Thursday night, 01/13/2000, batch cycle. This additional year-end report run should not be considered an "official year-end" report run in regards to the year-end closing schedule issued by OFM.

The official year-end report run #9 will occur, as scheduled, in the Friday night, 01/14/2000, batch run. These reports will be available in RMDS late Saturday 01/15/2000.
